Transfer Depts.

Allows users to transfer departments with validation.

Enter Amounts

Allows users to enter an employees tips for the day.

View Totals

Allows users to view employees total worked ours

Easy To Use Software

PayClock takes care of the time consuming and error-prone process of tracking time and attendance data so you don't have to.

This automated time and attendance systems offers big business efficiency at a small business price. Lathem's PayClock PC600 System automatically calculates worked hours including overtime as well as providing the tracking of benefit time for 50 employees (and can be easily expanded to 1,000). The system consists of a touch screen proximity badge terminal and easy to use time and attendance software. The PC600 terminal uses Ethernet communications to connect to your local area network (LAN) or it can be accessed in remote locations over the Internet. Employees use proximity badges or enter PIN numbers to punch in and out, transfer departments or enter tips and amounts. Supervisors can add employees, edit punches and send messages to employees directly at the terminal for fast and effective workforce management. At the end of the pay period comprehensive payroll and attendance data can be viewed on the screen, printed to reports, sent to Excel, or exported directly into your existing payroll software for a seamless punch to paycheck solution.

PC600 Terminal Features

This affordable, yet stylish terminal is packed with the latest in technology!
