

# REINER Speed-i-jet Printing Practice Page

When using the Speed-i-jet, please remember the following to insure success:

- 1) Hold the Speed-i-jet as you would a pencil.
- 2) Rest the print head on the paper surface BEFORE pressing the red button.
- 3) Press the red button while SIMULTANEOUSLY moving the Speed-i-jet to the right.
- 4) Move it slowly and you will get condensed printing.
- 5) Move it quickly and you will get expanded printing.
- 6) Practice makes perfect. Takes just a few tries to perfect!
- 7) If you are left-handed, you can change the print OPTIONS to move the Speed-i-jet from Right to Left.

All examples were done with the default software settings for print delay and print rate.
